खास

- आधा से पैट कर सकेंगे स्टूडेंट्स
- होंगे कुलपति सुभाष धूलिया, नए सत्र से मिलेगी यह सुविधा
- वीडियो लेक्चर की भी सुविधा

यह है पाठ्यक्रम

Uttarakhand Open University was established in 2005 with an aim to disseminate knowledge through distance learning with the introduction of flexible and innovative methods of education. In a bid to keep up with the developments in the Education industry, UOU has tied up with Schoolguru in launching Online Programs and thus making their courses accessible to more students.

Schoolguru thus now makes its presence felt in three zones in India and continues in its efforts towards making technology enhanced and quality higher education affordable and accessible to every aspirant in the Country.

The University recognizes the power and potential of technology and its impact on Open and Distance Learning. The University believes that technology has had—and will continue to have—a significant impact on higher Education. Online learning is gaining a firm foothold in universities around the world and there has been a significant impetus on this medium of education from the Indian government. The University considers online learning key to advancing the mission—reaching people who might otherwise not be able to access it.

The University has launched several ICT Enabled Programs where the students will be able to learn through the video lectures of the professors. The students of these courses shall, apart from their regular printed study material, also get access to these video lectures of the professors for all the topics in the syllabus.
